SUMMARY

Computer Science graduate (B.Tech, 2025) with hands-on experience in Python and Java, building software and data-driven applications. Strong foundation in DSA, OOP, SQL and machine learning. Seeking software, ML/AI, data science, or full-stack engineering roles where I can ship clean, reliable code.

EDUCATION

B.Tech, Computer Science & Engineering — GITA Autonomous College 2022 – 2025
Bhubaneswar, Odisha

Diploma, Computer Science — DRIEMS 2019 – 2022
Tangi, Odisha

EXPERIENCE

Python Programming Intern — Motion Cut Pvt. Ltd. Jul 2024 – Aug 2024
Remote, Lucknow, India

- Built data pipelines for preprocessing, feature engineering and cleaning across real-world datasets using Pandas and NumPy.
- Delivered exploratory data analysis and visualizations that surfaced actionable patterns for decision-making.
- Strengthened production-style workflow with Git-based version control and structured, project-driven delivery.

PROJECTS

Aethro AI — Full Stack AI Chatbot React, Flask, Docker, OpenRouter API

- Built a full-stack AI chatbot with a React/Vite frontend and Python Flask backend, integrated with a 120B-parameter LLM via OpenRouter API.
- Implemented real-time response streaming using Server-Sent Events (SSE) so output appears word by word.
- Persisted conversation history in SQLite, built an animated day/night sky UI in pure CSS, and deployed via Docker on Hugging Face Spaces.

Student CGPA Calculator React, Vite, JavaScript

- Built a client-side CGPA calculator in React/Vite with grade conversion, percentage calculation, and modular logic helpers.

Algerian Forest Fires — FWI Prediction Python, scikit-learn

- Built and evaluated a regression model to predict the Fire Weather Index from meteorological data.
- Engineered features with scaling and categorical encoding; compared Linear, Ridge, Lasso and ElasticNet to cut overfitting.
- Published a reproducible end-to-end workflow with performance visualizations on GitHub.

Library Management System Java, OOP, MySQL

- Designed an OOP-driven system automating book inventory, member registration and issue/return operations.
- Integrated a MySQL backend for persistent records, reducing manual effort and improving data accuracy.

Exploratory Data Analysis Toolkit Python, Pandas, Seaborn

- Performed end-to-end EDA on structured datasets: cleaning, feature engineering and correlation analysis.
- Produced clear visualizations that translated raw data into interpretable insights.

TECHNICAL SKILLS

Languages	Python, Java, JavaScript, SQL
ML / Data	scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, EDA, Regression
Web & Backend	React, Vite, Flask, REST APIs, SQLite, MySQL, HTML, CSS
DevOps	Docker, Git, GitHub, Hugging Face Spaces
Tools	Jupyter, VS Code, Eclipse, Linux
